

Our **Science** this term has been all about Properties of Materials. We have had a great time investigating states of matter, reversible and irreversible changes, evaporation and how to separate mixtures of materials.

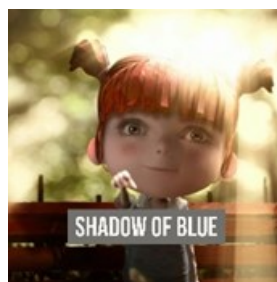

Our **Art** skills this half term have been based on different printing techniques especially focused on the theme of movement.

5 Bell Spring 1 2022

In **RE** we have been exploring the key question of *Christianity: Creation and science; conflicting or complimentary?* We finished with a class debate.

In our **English** work, we have used a wonderful short film called 'Shadow of Blue' to inspire a range of writing including a balanced argument, narrative poetry, play scripts and figurative language.

In **History**, we have been learning about key events that happened between 1066 and 1485. We have learned how the Battle of Hastings happened, the reasons behind the Magna Carta and how it affects us today, as well as the hundred Years War and start of the House of Tudor.
